New shop - new features:

Ordering barcodes by smartphone

No scanner at hand at the moment? No problem, because it's even easier with your smartphone. Simply activate the camera and scan the barcode!

Caliber and product search in one field

Without issues: Regardless of whether you enter the caliber or article number - you will come straight to the movement you are looking for!

Graduated prices

You can now see directly in the article window the quantities from which you save! No more time-consuming updating in the shopping cart. Graduated prices at a glance!

Images in list view

Because sometimes the description is not enough. The list view with clear article images and enlargement on mouseover!

Quick check-out in the shopping cart

No annoying checking of all information; Quick-Check-out adopts your default settings and the order is completed with just one click.

Different favourites lists

So that watchmakers and goldsmiths don't get in each other's way. Create different favorites lists for different departments in your company. Watchmakers, goldsmiths, salespeople, etc.

Change delivery addresses yourself

Simply change the desired delivery address at the checkout. Anytime, without problems!

Additional account

For departments or branches with identical billing addresses, you can now easily create an additional account with the same customer number.

Ordered quantities in the article overview

De aantallen, van de bestelde artikelen, ziet u in Goods that have already been ordered are displayed with the quantity - at a glance - in the list view! You can keep track of things without having to switch to the shopping cart every time.
